

E31 Charger

Highlight Features

Impact Resistance

High-tech PC material is used in casting with excellent resistance to pressure and compression suitable for harsh environment

Multi Protection

Over current, over voltage, under voltage, surge, short circuit, ground fault, over temperature, leakage, and sticking of relay detection

Integrated RFID Card Reader

Support RFID authority management which enables switching from free charging mode to card charging mode

IP65 Protection

Built and designed to withstand both outdoor and indoor use with IP65 protection rating (connector IP54)

Real-time Dynamic Display

- Integrated 1.3" OLED screen
- With clear LED lights indicating the dynamic charging status of the charger on power, connection, charging and malfunction

Smart Charging

Control & plan your charging intelligently via APP. See live values for the charge session and overview of all charging data

Area Light Design

Light sensor will automatically turn on area light and provides more convenience at night

Interoperability

- Built-in Ethernet, Bluetooth, Wi-Fi, and cellular connectivity
- Fully compliant with OCPP for integrating with 3rd-party platforms
